Bespoke by Crozier Campers

At Crozier Campers, we offer two build paths: our Beyond range and our fully bespoke builds. Both are crafted with the same care and quality, but they are shaped around different types of journeys.

The ***Beyond*** range is the product of years of building bespoke campers and listening closely to customer feedback. Every design has been refined through real-world use, learning what works on the road, what does not, and what makes life in a camper flow more easily. The result is a series of layouts that represent the very best of our experience, carefully engineered to work for most people.

Beyond is also highly configurable. With 66 optional extras available, it can be adapted to suit almost any lifestyle, whether that is weekend getaways, family adventures, or long-distance travel. Customers also have full control over the details inside the van, choosing the colours, fabrics, and finishes that make the space feel like their own. This balance of proven design and flexible personalisation makes ***Beyond*** a reliable yet expressive choice.

A ***Bespoke*** build, by contrast, is where we start from a blank sheet of paper. It is the route for those with very specific requirements, whether that is accessibility-focused features, a dedicated workspace, or expedition-ready systems for extended off-grid travel. Every detail is created around the individual, offering maximum freedom and uniqueness, though with a longer build process and more decisions to make.

Both routes deliver a camper that feels like home. The difference lies in whether you would prefer the confidence of a layout distilled from years of customer feedback and adaptable through extras and finishes, or the complete freedom of shaping something entirely unique from the ground up. With either choice, our focus is always the same: creating a camper that is functional, well designed, and expertly engineered to take you anywhere you want to go.

Estimated Build Pricing

All pricing includes VAT

Approved Used Chassis (Rear wheel drive) - £115,000 (£37,000 base vehicle + £78,000 estimated build cost) Based on a Mercedes-Benz Approved Used chassis with an estimated criteria of 1-2 years old, 20-30,000 miles, Pro model (Tempmatic Air-conditioning, Cruise Control & Reverse Camera) & 12-24 month Mercedes Benz warranty.

Servicing

We offer annual servicing plans that cover the interior, electrical and plumbing systems. Our servicing plan can also cover any mechanical servicing and an MOT whilst it's with us. This will keep you on the road for another year and give you peace of mind on your adventures. With our annual servicing, you will have the opportunity to extend your warranty for another 12 months annually.

Upgrades

All our builds are designed and built in a modular fashion which means we can easily refresh or upgrade parts of the build. This is perfect for lifestyle changes; your van can change with you. This includes the furniture, electrical and plumbing systems and also the exterior.

Storage

We offer secure on-site vehicle storage for all our customers, which is particularly convenient for our international clients. We also provide storage plans that include monthly maintenance and comprehensive detailing services.

Prices correct as of September 2026. Prices may vary.
